PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER:

0084 (Tng)

SESSION NUMBER:

DATE OF SESSION: 19 JAN 90 DATE OF REPORT: 22 JAN 90

START:

>

1427 END:

1433

METHODOLOGY:

CRV

VIEWER IDENTIFIER: 052

1. (S/NF/SK) MISSION: To describe the target site (St. George Island in the Pribilofs) in Stage I terminology.

(S/NF/SK) VIEWER TASKING: Encrypted Coordinates only. 2.

(S/NF/SK) COMMENTS 052's first two ideograms were the ones pertainent to the site in order: (1 $\frac{1}{4}$ nd / water). The transcript, feelings, and perceptions gained in the session were analyzed after the session to use 052's own work to illustrate and discuss problems and successes.

(S/NF/SK) EVALUATION:

(S/NF/SK) SEARCH EVALUATION: 5.

MONITOR: 018

HANDLE VIA SKEET CHANNELS ONLY

visit St. Paul each summer. There's a limit to how many the island can handle."

The "numaniacs," as some Aleuts call the preservationists, concede that seals die most quickly and with the least trauma when killed be stunning and sticking. But they object to the harvest on grounds of unnecessary killing and the high cost to the government of the Pribilof program. The federal covernment spends 5.3 million dollars a y ar—75 percent of Pribilof income.

Walter Kirkness, director of the Pribilof Islands Program for the National Marine Fisheri Service, offers a rebuttal, "If we halt seing, it would lead to abrogation of the treation free-for-all slaughter of seals at sea without any international controls at all. That would be deviatating to the seals,"

Mike Zacharof had an even more basic object: "Instead of worrying about seals, which is in no danger of extinction, why y about an honest-to-goodness endanger I species—the Aleut people?"

Since the Russians first gained sway over

Alaska, Aleuts have decreased from an estimated 20,000 to a mere 3,200. White man's diseases wiped out many. So did a Russian disregard for native lives.

Under U. S. administration, a repressive bureaucracy brought little progress until, in 1971, the federal government settled aboriginal claims for land and compensation and gave Alaska's Aleuts, Eskimos, and Indians a means to control their lot. The settlement established profit-making corporations for each native village and region, with every villager a shareholder. For St. Paul's Tanadgusix, the chief profit makers are hotels and a restaurant.

Islanders won a reprieve for sealing when Congress extended the fur seal treaty through 1984. They were helped by the Sierra Club and National Audubon Society, which supported the treaty and looked upon it as a hallmark of wildlife conservation and management.

But a new threat to the islanders' economic well-being has suddenly loomed.

"It's called Reaganomics," said Agafon

New Day for Alaska's Pribilof Islanders
